STATEMENT OF THE CHAIRMAN

It is my pleasure to report that 2017 was a good year for Rwanda Stock Exchange (RSE). As the fundamentally our economy remained resilient despite challenges across the globe especially in sub Saharan Africa due to commodity prices and world oil markets volatility. We have seen some recovery this year in the commodity prices and prompt response from our trading counters and indices. These developments clearly makes our role as a stock exchange becoming even more relevant. Given the fact that the RSE was established to facilitate implementation of the country's economic reforms and encourage wider ownership of public resources, collaboration and support from the Government and other key stakeholders continues to be key towards supporting the country's economic development. The RSE strategy and Plans therefore, aim at positioning the RSE as the focus for raising capital for private enterprises and to the Government development

“ We remain very positive about the opportunities to grow our Exchange as we are well positioned to capitalize on the ongoing economic reforms and development in the country through providing efficient capital raising platform to support growth. ”

projects through providing the platform for mobilizing savings for productive investments activities and creating investment opportunities for investors.

During 2017, RSE continued for the third year the implementation of its new 5 year strategic plan where efforts and resources were directed towards preparation for the sensitization large corporate and with a continued emphasis the Small and Medium Enterprises Market Segment (SMEMS) and retail investor market niche, increasing on efficiency levels and raising the profile of the exchange.

In the course of the year we increased our visibility on world stage by actively participating in different regional and international conferences and activities. The RSE actively participated in the 2nd Annual Botswana Stock Exchange Listing & Investment Conference on 09th March, 2017 which was graced His Honor The Vice President of the Republic of Botswana. Mr. Mokgweetsi E. K. Masisi.

I am also happy to note that this year we have continued our work with the World Federation of Exchanges (WEF) as a correspondent member and actively pursued our interactions and consultations with the UN's Sustainable Stock Exchanges initiative (SSE) through their working groups after joining in 2015. This initiative aims to provide an effective platform for peer-to-peer dialogue among global exchanges. RSE has joined number 5 on the continent after Nigeria, Mauritius, Ivory Coast and the Nairobi Securities Exchanges and a few more Exchanges that have joined this year.

The Outlook is exciting, as all these efforts start to bear fruits i.e. increase activity, broaden the range of products, streamline the operations and commercialize the RSE as an entity.

During this period we continued our efforts towards the automation of the exchange. The Market Capitalization at the close of 2017 was at USD 3.47 billion slightly up from USD 3.3 billion

at the end of 2016 due to price recovery across the board and additional listing.

With regard to the fixed income securities, the government's quarterly bond issuance program continued with an average of 150.6 subscription rate.

This increased secondary trading activity in the fixed income securities to the tune of 218.7% and 80.8% % in bonds turnover and number of transactions, respectively compared to the same period in 2016.

The recorded performance positively impacted the financial performance during the year. The RSE internal income generated increased by 30% from Rwf 301.5 million in 2016 to Rwf 392.1 million in 2017. We managed to stay within the projected performance despite the fact that we operated in a turbulent year mainly due to exogeneous factors. On behalf of the Board of Directors, Management and the rest of the members of staff at Rwanda Stock Exchange, I wish

to acknowledge and extend our appreciation to the continued support of the Government of Rwanda through the Ministry of Finance to the CMA. It is our sincere belief that the Government will continue supporting the RSE for the foreseeable future.

I am also grateful to all our development partners such as Financial Sector Development Plan (FSDP), Banque National Du Rwanda (BNR) and the Private Sector Federation (PSF) for their support in developing the market. During the year under review we intensified the Public awareness campaigns for Small and Medium Enterprises Market Segment at the RSE and increased our presence up country road shows for the general public. We believe through these we will envisage to result into an appetite for Small & Medium Enterprises raising capital and list on the Exchange and see more participation from the general public on the demand side.

Again in a special way I acknowledge with appreciation the outstanding role played by all my colleagues (the Members of Board of Directors) for their continued contribution and commitment to the development of the Exchange .The concerted efforts by the Management and the Board should push even further the development agenda of the RSE in years to come.

On behalf of the Board, I would like to also thank the RSE Management and entire team

of staff for their dedication and commitment in ensuring that the Exchange meets its strategic objectives even during challenging moments.

In the longer term, we remain very positive about the opportunities to grow our Exchange as we are well positioned to capitalize on the ongoing economic reforms and development in the country through providing efficient capital raising platform to support growth.

Dr. James Ndahiro
Chairman

MANAGEMENT

The management of RSE during the year and to the date of this report was:

	Names	Positions

7	Mr. MUNYANEZA Joseph	Financial Analyst

1. Financial Highlights

PROFIT/LOSS FOR THE YEAR (MN)

2. Market performance

a. Rwanda Shares Index (RSI)

b. All Shares Index (ALSI)

C. Market participation by end of 2017

D. Comparison turnover between 2016-2017

2. ECONOMICS OUTLOOK

2.1. Global Economic outlook

According to IMF estimates, the global economy maintained a positive momentum in 2017 relative to 2016, buoyed by strong consumer confidence which supported investment, consumption and global trade. Real GDP growth for 2017 was estimated at 3.7 percent, higher than 3.2 percent recorded in 2016. Positive growth prospects are expected to continue in 2018 and, global growth projection revised up to 3.9 percent, 0.2 percent higher than October 2017 forecast.

2.2. Emerging Markets

Growth for emerging and developing economies improved to 4.7 percent in 2017 from 4.4% in 2016 and is projected at 4.9 percent in 2018. In China, GDP grew by 6.8 percent in 2017 from 6.7 percent in 2016, as a result of strong consumption and a rebound in investment as well as in industrial production. However, Chinese growth is expected to slow to 6.6 percent

in 2018, due to slowing exports and government's regulatory tightening in the financial sector.

2.3. Sub Saharan Africa and EAC

South of the Sahara economic growth increased from 1.4 percent in 2016 to 2.7 percent in 2017 and is projected to reach 3.3 percent in 2018 following a recovery in commodity prices that has helped oil exporting countries like Angola and Nigeria, and improving weather conditions that have eased pressures on the agriculture sector.

In the mean time, growth in the East African Community (EAC) continued its resilient in 2017 despite facing some challenges related to bad weather. Growth for Kenya, Rwanda and Tanzania remained robust, though below their 2016 levels.

2.4. The Rwandan Economy outlook

The economy grew by 6.1 percent in 2017 beating original expectations of 5.2 percent for the year and dismal performance in the first quarter and second which went was 1.7 percent and 4.0 p percent, respectively. This was mainly on the back of improved agricultural performance linked to good weather conditions.

The good performance of the Rwandan economy observed in 2017Q3 continued in 2017Q4 especially as evidenced by the leading indicators of economic activities was observed in the composite index of economic activities (CIEA) which increased, in real terms, by 16.4 percent

from 12.4 percent in 2017Q3 and 6.5 percent in 2016Q4. Total turnovers of industry and service sectors rose by 19.3 percent in 2017Q4, higher than 6.9 percent registered in the same period of 2016.

The good performance in total turnovers was mainly driven by the service sector, with a share of 74.1 percent, increasing by 17.3 percent in 2017 from 11.0 percent registered in the previous year. The sector's performance is mainly attributed to the wholesale and retail trade (26.1 percent), transport and storage (16.7 percent), petroleum products (15.4 percent), as well as financial and insurance activities (11.1 percent). (BNR, Monetary policy and financial stability, 2017)

3 . MARKET PERFORMANCE

On the Rwanda Stock Exchange (RSE), equities trading activities went up compared to the same period of 2016 due to the listing of I&M Bank, Bralirwa Ltd performance (Share price recovery) and good participation of investors in the bond market. Bank of Kigali Ltd was the most active counter followed by Bralirwa Ltd in terms turnover and transactions.

3.1. Primary Market

During the period under review the government of Rwanda issued four Treasury Bonds two for 5 years and other two for 7 years with a face value of Frw 40 billion and subscribed at 113%; 209%; 102% and 178.4% respectively.

On the equities primary market, there was a new Initial Public offering (IPO) of I&M Bank Ltd, the oldest commercial bank in Rwanda where the government of Rwanda was offloading its stake of 99,034,000 shares to the public at an initial price of Frw 105.

3.2. Secondary market

3.2.1 Bond market

During the period under review, 4 Government Treasury bonds with a face value of Frw 40 billion were issued and listed on RSE fixed income trading board. The secondary market for bonds registered a turnover of Frw 5.1 billion traded in 179 transactions. This translated into an increase of 218.7% and 80.8% in terms worth of bonds traded and number of transactions compared to the same period of 2016.

Figure 1: RSE,2017

The equities market recorded a total turnover of Frw 15.8 billion from 98.4 million of shares traded in 903 transactions and rose 2.6% in turnover compared to Frw 15.4 billion recorded in the same period the previous year of 2016.

Comparison for market total turnover 2016-2017

Figure 2: RSE,2017

3.3 RSE indices

From January to December, 2017 the All Share Index (ALSI) went up 4.8% to close at 133.48 points and Rwanda Share Index (RSI) went up 12.9 % to close at 135.38 points.

RSE Rwanda Share Index (RSI)

Participation in the Genocide Memorial Tennis Tournament, 2017

RSE, CMA, ICPAR and EAX visited Murambi South Province memorial site of Genocide against Tutsi in 1994

Signing of a Memorandum of Understanding with
Chartered Financial Analyst (CFA) Institute

4.2 Capacity building

RSE staff members participated in different workshops, seminars and conferences at home and out of the country in the following areas:

- a) Fixed income securities focusing on fixed income fundamentals,
- b) Fundamentals of inflation,
- c) Trading strategies and market risks among others.
- d) Real Estate Investment Trust (REITs)
- e) Global Financial markets

4.3 Information and Technology

Rwanda Stock Exchange has continued to invest in Information and Technology for software and hardware infrastructure.

The automation agenda continued to be a priority and its implementation process is in the final stages.

4.4 Corporate Social responsibility (CSR) activities

Corporate Social Responsibility is the continued commitment by businesses to behave ethically and contribute to the economic development while improving the quality of lives of workforce and their families as well as of the

local community and society in general. Under CSR, the Rwanda Stock exchange staff together with CMA, ICPAR, RNIT and all brokerage houses contributed to the families of Murambi memorial genocide survivors.

The directors do not recommend the declaration of dividend for the period 2017

DIRECTORS

The directors who held office during the year and to the date of this report are shown on page 1.

AUDITORS

The company's auditors, MN & Associates were appointed during the year 2016 and continue in office in accordance with Law No. 27/2017 Of 31/05/2017 relating to companies.

BY ORDER OF THE BOARD

DIRECTOR
KIGALI

STATEMENT OF DIRECTORS' RESPONSIBILITIES

Law No. 27/2017 Of 31/05/2017 relating to companies requires the directors to prepare financial statements which give a true and fair view of the state of affairs of the company as at the end of the financial year and of the results for that year. It also requires the directors to ensure that the company maintains proper accounting records which disclose with reasonable accuracy the financial position of the company. The directors are also responsible for safeguarding the assets of the company.

The directors accept the responsibility for the financial statements which have been prepared using appropriate accounting policies supported by reasonable and prudent judgements and estimates, consistent with previous year, and in conformity with International Financial Reporting Standards (I.F.R.S. for S.M.Es) and the requirements of law No. 27/2017 Of 31/05/2017 relating to companies. The directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the company as at 31st December 2017 and of its operating results for the year then ended. The directors further confirm the accuracy and completeness of the accounting records maintained by the company which have been relied upon in the preparation of the financial statements, as well as on the adequacy of the systems of internal financial controls.

Nothing has come to the attention of the directors to indicate that the company will not remain a going concern for at least the next twelve months from the date of this statement.

Approved by the board of directors on _____ 2018 and signed on its behalf by:

5. REPORT OF THE INDEPENDENT AUDITORS TO THE BOARD MEMBERS OF RWANDA STOCK EXCHANGE

Opinion

We have audited the accompanying financial statements of Rwanda Stock Exchange set out on pages 6 to 19 which comprise the statement of financial position as at 31 December 2017, the comprehensive income statement, statement of changes in equity and cash flow statement for the year then ended and a summary of significant accounting policies and other explanatory notes.

In our opinion, proper books of account have been kept and the financial statements, which are in agreement therewith give a true and fair view of the financial position of Rwanda Stock Exchange as of 31 December 2017, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards for small and medium-sized entities (IFRS for SMEs) in the manner required by law No. 27/2017 Of 31/05/2017 relating to companies.

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the audit of the Financial Statements section of our report. We are independent of Rwanda Stock Exchange in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Directors' responsibility for the financial statements

The directors' are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards SMEs and the requirements of Law no. 27/2017 Of 31/05/2017 relating to companies. This responsibility includes designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Professional skepticism as part of an audit in accordance with ISAs, we exercise professional judgement and maintain throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedure that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal requirements

As required by the Law no. 27/2017 Of 31/05/2017 relating to companies in Rwanda we report to you, based on our audit, that:

- (i) We have no relationship, interests or debts in the company
- (ii) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- (iii) In our opinion, proper books of account have been kept by the company, so far as appears from our examination of those books; and
- (iv) The company's statement of financial position and comprehensive income statement are in agreement with the books of accounts.

SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

a) Basis of preparation

The financial statements are prepared on a historical cost basis in accordance with International Financial Reporting Standards (IFRS for SME's).

b) Revenue recognition

Initial listing income is recognised in the year in which the listing company makes the floatation. Additional listing income is recognised during the year in which the issuing company makes announcement of the bonus/right issue.

Transaction levy income is based on a percentage of the value of shares traded and is recognised on the date of the transaction.

The company recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when the specific criteria have been met for the company's activity as described below. The amount of revenue is not considered to be reliably measured until all contingencies relating to the sale have been resolved. The company bases its estimates on historical results, taking into consideration the type of customer, type of transaction and specifics of each arrangement.

c) Equipment

All equipment is initially recorded at cost and thereafter stated at historical cost less depreciation. Historical cost comprises expenditure initially incurred to bring the asset to its location and condition ready for its intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost can be reliably measured. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the income statement during the financial year in which they are incurred.

Depreciation on other assets is calculated on straight line basis to write down the cost of each asset to its residual value over its estimated useful life using the following annual rates:

	<u>Rate %</u>
Furniture & fittings	25
Equipments	25
Computers	50

The assets residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposal of property and equipment are determined by comparing the proceeds with the carrying amount and are taken into account in determining operating profit.

d) **Translation of foreign currencies**

Transactions in foreign currencies during the period are converted into Rwandese Francs (the functional currency) at rates ruling at the transaction dates. Assets and liabilities at the balance sheet date which are expressed in foreign currencies are translated into Rwandese Francs at rates ruling at that date. The resulting differences from conversion and translation are dealt with in the income statement in the period in which they arise.

e) **Financial assets**

The company's financial assets which includes cash and cash equivalents and trade and other receivables fall into the following category:

- **Loans and receivables:** financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are classified as current assets where maturities are within 12 months of the balance sheet date. All assets with maturities greater than 12 months after the balance sheet date are classified as non-current assets. Such assets are carried at amortised cost using the effective interest rate method. Changes in the carrying amount are recognised in the income statement.

Purchases and sales of financial assets are recognised on the trade date i.e. the date on which the company commits to purchase or sell the assets. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the company has substantially transferred all risks and rewards of ownership.

A financial asset is impaired if its carrying amount is greater than its estimated recoverable amount. The amount of the impairment loss for assets carried at amortised cost is calculated as the difference between the assets carrying amount and the present values of expected future cash flows, discounted at the financial instrument's effective interest rate. Impairment losses are taken into account for determining operating profit.

f) **Financial liabilities**

Financial liabilities are recognised initially at fair value and subsequently measured at amortised cost, using the effective interest rate method.

Trade and other payables are classified as financial liabilities.

g) **Retirement benefit obligations**

The company and its employees contribute to the "Rwanda Social Security Board", a statutory defined contribution scheme. The contributions are determined by the local statute and are currently limited to 5% of the employees gross salary excluding transport allowance per month. The company's RSSB contribution are charged to the income statement in the year to which they relate.

h) **Government Grants**

Government grants are recognized when there is a reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognized as income over the period necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Where the grant relates to an asset, the fair value is credited to a deferred income account and is amortised over the expected useful life of the asset.

i) **Trade receivables**

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest rate method, less provision for impairment.

Impairment of trade receivables is recognised in the income statement under administrative expenses when there is objective evidence that the company will not be able to collect all amounts due per the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default in payments are considered indicators that the trade receivable is impaired. The impairment provision is based on the difference between the carrying amount and the present fair value of the expected cash flows, discounted at the effective interest rate.

Receivables not collectible are written off against the impairment provision. Subsequent recoveries of amounts previously written off are credited to the income statement under administrative expenses in the year of their recovery.

j) **Cash and cash equivalents**

For the purposes of the cash flow statement, cash and cash equivalents comprise cash in hand, deposits held at call with banks, and financial assets with maturities of less than 3 months, net of bank overdrafts and money market lines.

k) **Trade payables**

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest rate method.

l) **Taxation**

Current tax

Current tax is provided on the results for the year, adjusted in accordance with tax legislation.

Deferred tax

Deferred tax is provided using the liability method for all temporary timing differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. Currently enacted tax rates are used to determine deferred tax. Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which temporary timing differences can be utilised.

m) **Share capital**

Ordinary shares are classified as equity.

n) **Comparatives**

Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

NOTES TO THE FINANCIAL STATEMENTS

	2017 Frw	2016 Frw
1. Revenue

15. i) There were no contingent liabilities as at 31 December 2017.

ii) **Operating lease commitments**

There were no operating lease commitments as at 31 December 2017.

16. **Risk management objectives and policies**

Financial risk management

The company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk.

The company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the company's financial performance.

Risk management is carried out by the board of directors. The board identifies, evaluates and hedges financial risks in close co-operation with various staff in the organisation.

(a) **Market Risk**

- *Foreign exchange risk*

The company is exposed to foreign exchange risk arising from various currency exposures primarily with respect to the US\$. The risk arises from assets and liabilities in the balance sheet.

(b) **Credit risk**

Credit risk arises from cash and cash equivalents, as well as credit exposures to customers, including outstanding receivables.

Management assesses the credit quality of the customer, taking into account their financial position, past experience and other factors.

None of the financial assets that are fully performing has been renegotiated in the last year.

Exposure to this risk has been quantified in each financial asset note in the financial statements along with any concentration of risk.

(c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents to meet obligations as they fall due. The company ensures its inflows and outflows are matched sufficiently to minimise its exposure on liquidity risk.

17. Capital management

The company's objectives when managing capital are:

- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk;
- to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- to maintain a strong asset base to support the development of business.

The company sets the amount of capital in proportion to risk. The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt. Consistently with others in the industry, the company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by capital. Net debt is calculated as total debt (as shown in the balance sheet) less cash and cash equivalents. Capital comprises all components of equity (i.e. share capital and retained earnings).

18. Country of incorporation

The company is incorporated in Rwanda under the company law of Rwanda and is domiciled in Rwanda.

19. Presentation currency

These financial statements are presented in Rwandan Francs (Frw).
